SUMMARY

Computer Engineering student interested in AI and software development. Completed 10+ individual and team projects in machine learning, NLP, web scraping, automation, and data structures. Familiar with Python, Java, C++, scikit-learn, LangChain, FastAPI, and Docker. Looking for an internship to gain hands-on experience and grow as a developer.

EDUCATION

Recep Tayyip Erdogan University

B.Sc. in Computer Engineering | GPA: 2.71/4.00

– Key Coursework: Data Structures, Computer Networks (AA), Differential Equations (AA), Linear Algebra (AA), OOP, Database Management Systems, Operating Systems

Trabzon, Turkey

Sep 2024 – Present

Adana Alparslan Turkes Science and Technology University

English Preparatory School | 81/100 (Advanced Level)

Adana, Turkey

Sep 2023 – Jun 2024

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL, JavaScript, HTML/CSS

ML/AI: scikit-learn, XGBoost, LightGBM, SHAP, TensorFlow, LangChain, ChromaDB, RAG Architecture

Web & Tools: FastAPI, Streamlit, Flask, REST APIs, Docker, Git/GitHub, PostgreSQL, Supabase, n8n, Maven

PROJECTS

Credit Risk Scoring Model | *scikit-learn, XGBoost, SHAP, FastAPI*

GitHub

- Built credit default prediction pipeline comparing 4 models on 10,000+ samples, achieving **AUC-ROC: 0.87, KS: 0.61, Gini: 0.75** with 19 crafted features.
- Applied SHAP explainability across all 19 features and deployed FastAPI endpoint for real-time scoring of loan applications.

Real-Time Fraud Detection System | *XGBoost, Isolation Forest, FastAPI*

GitHub

- Trained ML ensemble on 50,000 transactions achieving **F1: 0.99, FPR: 0.02%**. Designed 20+ domain features (velocity, amount anomaly, temporal signals).
- Built rule-based alert engine with 6 configurable thresholds, handling 98%/2% class imbalance via SMOTETomek resampling.

Banking FAQ Chatbot (RAG) | *LangChain, ChromaDB, FastAPI*

GitHub

- Indexed 4 banking documents into 22 chunks with multilingual embeddings, achieving relevant retrieval for Turkish banking queries.
- Enforced 5 compliance guardrails: out-of-scope detection, PII masking, confidence scoring, fallback routing, and regulatory disclaimers.

PDF Assistant (RAG Q&A) | *LangChain, OpenAI, Streamlit*

GitHub

- Built document Q&A system supporting 4 languages (TR/EN/DE/FR) with multi-PDF upload and conversational querying.

Price Tracker Bot | *Playwright, Supabase, Telegram API, Streamlit*

GitHub

- Automated price tracking for 2 major e-commerce platforms (Trendyol/Amazon) with real-time Telegram alerts and Plotly price history dashboard.

Comic Book Manager | *C++, CMake, Google Test* | Academic Project

- Created 10+ data structures (B+ Tree, XOR Linked List, Hash Tables, BFS/DFS) with Huffman compression, KMP search, and 18+ unit tests.

OTHER

Entrepreneurship: n8n AI Automation Bundle – 2,055+ workflow templates with AI recommender chatbot, published on Gumroad (GitHub)

Competition: Teknofest 2026 – IKA Project, Software Team (In Progress)

Certificate: TEOL Advanced English – Adana Alparslan Turkes University (81/100)

Languages: Turkish (Native) | English (Advanced – B2)
